PROFESSIONAL SUMMARY

A results-oriented Senior Document Controller with 8+ years of experience in construction and real estate sectors. I specialize in optimizing document workflows using Aconex and SharePoint, and leveraging Power BI and Python to provide data-driven insights that support project timelines and decision-making.

KEY ACHIEVEMENTS

- **Process Automation:** Engineered and implemented comprehensive document control workflows on Aconex for high-profile banking projects, significantly improving traceability and audit trails.
- **System Innovation:** Developed and deployed a unified document coding system for a major residential compound project, standardizing information exchange and enhancing collaboration between all project parties.
- **Data-Driven Reporting:** Performed data extraction and analysis across thousands of technical documents to identify submission statuses; this process consistently identified and categorized critical items for resubmission, which significantly accelerated consultant review cycles.
